FORTY GRADS AT DULUTH SEEN BY FACULTY MEMBER

All Still Enthusiastic About Alma Mater

Having won their diplomas and saying goodbye to classmate and teacher, the 40 Grads of the class of 1921 were back in Duluth Friday where they spent a week-end in their Alma Mater.

In the course of their week-end, these members of the class of 1921 visited the old digging compartments and talked to the students and faculty members about their experiences in school.

They expressed their enthusiasm for the school, and many said they would like to return to Duluth at some time in the future.

**MILK BACK TO NORMAL**

For the first time since the beginning of the World War, the milk production of this country will this season exceed that of last season, reports the U. S. Department of Commerce. Specialists of the department fear, however, that the increase may be only temporary during the "flush" of the season and that prices will not pass to well developed dairy districts. It may continue into the winter, however, and be maintained during the summer months, but it is regarded as being due mainly to increased supplies of milk from the factories and the fact that it permits the consumption of some of the surplus.

The situation is critical, however, and the falling off of the demand for milk in the manufacturing centers, factories, hotels, milk dealers, and similar outlets, for which the surplus milk is ordinarily sold, and the consequent surplus of supplies is giving rise to serious alarm. The drop in the demand is largely due to the lack of employment in the factories and the closing of many of them during the war. The surplus milk is now being sold at a lower price than the price at which it was sold last season.

**EUREKA COW TESTING**

There are fifteen local dairy committees in the state which are conducting the work. There are two such committees in the counties, and each has at least an assistant agent. Specialists of the department at Itasca, Aitkin, Beltrami, Marshall, Wadena, Otter Tail, Lake, Stearns, Crow Wing, and Cass counties have had large numbers of dairy cows tested, and the results have been most satisfactory. The changes in the law also affects county farm bureau and county extension services.

On Onweel, the official tester, has had 463 cows tested for milk and 34.8 pounds of fat. The high herd was the grade Guernsey, 1,055 pounds of milk and 37.5 pounds of fat. Mr. Ellis' three-year-old Holstein has had 463 cows tested and produced 51.6 pounds of butterfat. Onweneel, the official tester, has had 463 cows tested and produced an average of 51.6 pounds of milk and 37.5 pounds of butterfat. Of the 463 cows tested, 126 or 27.1% were classified as� low grade. This is 126 or 27.1% of the total number of cows tested.

**RACINE-KENOSHA TESTS**

AND FARM BUREAU LAW

The test work in the Wisconsin New Standards cow tests was begun by a grade committee of the Wisconsin New Standards organization. The committee consists of men who were chosen from the leading dairymen of the state. The tests were conducted under the supervision of Prof. N. K. Carnes, who is empowered to give out information on milk production and improve farming methods.

HAMPSTEAD IN WISCONSIN

According to the Census Report, the population is growing in Hamstead, with the result that the farm land is increasing. The city of Hamstead has an area of 3,000 acres, and is the largest city in the state. Hamstead is a commercial city, a lead, and a lead smelting center. The city is supplied with water from the nearby river, and is served by a good system of waterworks.

The farm land in Hamstead is owned by Frank Powless, whose farm is located on the outskirts of the city. The farm consists of 500 acres of land, and is situated on a hillside overlooking the city. The farm is well drained, and is supplied with water from a natural spring. The soil is a loam, and is well adapted to the cultivation of corn, oats, and other cereals. The farm is operated by Mr. Powless, who is a farmer by occupation.

The farm land in Hamstead is rented for $1,500 per year. The rent is paid in cash, and the tenant is responsible for all repairs. The tenant is required to pay the rent on the first of the month, and the landlord reserves the right to evict the tenant for non-payment of rent. The tenant is required to have his crops harvested by the first of the month following the harvest, and the landlord reserves the right to evict the tenant for failure to comply with this requirement.

The farm land in Hamstead is located in the state of Wisconsin, and is under the jurisdiction of the state of Wisconsin. The farm land is subject to the laws of the state of Wisconsin, and is subject to the laws of the United States.

**THE INTERNATIONAL**

The Triumph is built by the American Motor Car Company, which has grown out of experience which has been gained by the company in the production of cars. The company was formed in 1919, and is located in South St. Paul, Minnesota. The company has a world-wide market, and is represented in more than 200 countries. The company has a large sale force, and is a leader in the industry. The company has won many awards, and is renowned in the automobile world.
