They’re at it in the Mid-East

Jimm Mott receives research stipend for work at Ames

James Mott was recently awarded a $600 stipend from the Department of Chemistry at Iowa State University. The funds were provided by the Biology Department at Iowa State University, and are intended to support research projects. Jim was selected for one of the eight research positions awarded to undergraduate chemistry majors from colleges throughout the state.

The purpose of undergraduate research participation is to provide opportunities for students to further their professional development through active participation in significant research work. Many students find this type of work better acquainted with the nature and methods of research.

This summer at ISU, Jim will be working in the field of pyrolysis chemistry under the direction of Dr. W. R. Bearn. This is the second consecutive URPF award that Jim has received. He spent the summer of 1970 working with the team at ISU on the synthesis of pyrolysates.

Symphonic band holds brass concert

The Winona State Symphonic Band will hold a brass ensemble concert on Thursday, April 15, 1971, at 8:30 p.m. in the music room of the cafeteria. Admission to this concert will be the price of a brass ensemble ticket to attend the concert. Conducting will be by Dr. Donald Slove.

English Department receives okay for new master of arts program

Dr. Mott is currently working with Dr. David Rislove in the Department of Chemistry on the synthesis of pyrolysates from pyrolysis.

The Winona State Symphonic Band will hold a brass ensemble concert on Thursday, April 15, 1971, at 8:30 p.m. in the music room of the cafeteria. Admission to this concert will be the price of a brass ensemble ticket to attend the concert. Conducting will be by Dr. Donald Slove.

Winona State University is planning to open a new program received final approval last week from the North Central Association, accrediting agency for Midwest colleges and universities.

"A master of arts degree represents the college's present master of science program by permitting students to pursue the study of English language and literature in greater depth," according to Dr. James Nichols, English department head.

Dr. Nichols notes the program as being "very useful in providing teachers educated specifically to teach in the ever-growing number of junior colleges in the area and surrounding states.

It was explained that the program offers students three options:

1. The traditional master of arts degree, with concentration in English, involving graduate study in English language and literature and a master's thesis.

2. A non-thesis master of arts degree, substituting written examinations and course work in lieu of a thesis and an oral examination.

3. A master of arts degree program similar to the second, but including seminars and workshops in teaching college-level literature and composition, as well as teaching a course in freshman composition.

It is the latter option, according to Dr. Nichols, which offers master candidates the additional opportunity to prepare themselves, through practical work at the college level, to teach at the college level.

Dr. G. Theodore Mitsu, chancellor of the Minnesota State College System, said: "We are delighted that Winona State College is the first to offer the opportunity to prepare them to teach at the college level." The campus is the second to receive this permission.

Winona State College wins poetry reading competition

A new master of arts program in English, aimed especially at meeting the demand for junior college teachers will be offered for the first time at Winona State College this fall.

Dr. Donald R. Varner, vice president for Academic Affairs, said the new program, received final approval last week from the North Central Association, accrediting agency for Midwest colleges and universities.

"A master of arts degree supplements the college's present master of science program by permitting students to pursue the study of English language and literature in greater depth," according to Dr. James Nichols, English department head.

Dr. Nichols notes the program as being "very useful in providing teachers educated specifically to teach in the ever-growing number of junior colleges in the area and surrounding states.

It was explained that the program offers students three options:

1. The traditional master of arts degree, with concentration in English, involving graduate study in English language and literature and a master's thesis.

2. A non-thesis master of arts degree, substituting written examinations and course work in lieu of a thesis and an oral examination.

3. A master of arts degree program similar to the second, but including seminars and workshops in teaching college-level literature and composition, as well as teaching a course in freshman composition.

TO THE EDITOR:

Greeks give goodies

The proposed plan for the development of the Morgan block relates to the main campus and is subject to the approval of the Faculty. Inasmuch as Morgan has the necessary landscape and topography to make the development feasible, the plan will be proposed to locate in Winona rather than Rochester; considerable opposition came from that quarter.

The letter from my 7th grade English teacher, Mr. Mariner, leaves me more confused than ever. Though I can't be sure, I believe he was "rejection" to the comments I've made about Winona. Since he is an English teacher, and a good one as I recall, I expected him to be more concerned with vaguiness and underdeveloped ideas. No doubt, however, he embraces the "do as I say — not as I do" theory when teaching composition.

... I left rather compassion at last week. We Whiteman students are in a financial performance. I've always thought that the airconditioned are in an armchair performance. Some attempts should be made in appropriate, good disciplinary. I'm thinking of people in a small minority of the audience. I felt that at any moment I was being thrown into the darkness, in an armchair performance. I was not "properly" seated in cutoffs and a sweatshirt or similar familiar. Obviously, the changing times have passed by this Whiteman student on their way to who knows where. Had I been seated the same way, I probably would have felt even more out of place because I consider an armchair presentation far from appropriate. Students I expect to get my comprehensive test. Perhaps this will enhance my characteristics for success are enhanced by the fact that it does not represent the liberal forces of Winona. Perhaps I'm proposed to locate in Winona rather than Rochester; considerable opposition came from that quarter.

... the children's feet upon the stage appear to have just stubbed their toes.

The WSC math department is to be congratulated for advertising its "test-out" program wherein persons can write fundamental math courses upon satisfactory completion of a comprehensive test. Perhaps this will set a precedent for other less innovative departments!...
Multi-faceted talent of Lee Whiteway praised
by L. J. Turner

Last Wednesday WSC students and the Winona community were provided with a rare opportunity to be entertained by a multi-faceted talent in Lee Whiteway. Fiercely accomplished in mime, ballet, and music, gave an informative and entertaining performance which incorporated all elements of his artistic trinity.

Prefaced by an informal discourse on the history of dance and pantomime in the theatre, the first section of the performance centered upon a number of pantomime sketches from both the classic and the popular genres. Several were adaptations based upon the work of Marcel Marceau, the contemporary patriarch of pantomime. Whiteway's fluidity of movement and precision of gesture predestined him to the eminence of Marceau and Kipnis. Particularly indicative of his all-around abilities was the sketch entitled "David and Goliath" which involved rapid character transformations and movement. Overall, the pantomimes were executed in a manner that did much to belie the artist's youth in this intricate medium. The only "flaw" evident to this relatively untrained eye was the changing height of a "table" in the "Grafton's" sketch.

The harpsichord and its music has always fascinated me. Hence, I was delighted with the proficiency, knowledge, and variety Whiteway exhibited in the second portion of the evening's entertainment which focused on that instrument.

Following some remarks on the history of the harpsichord and its music, Whiteway's audience on a musical tour through the European countries prominent in the development of this, the forerunner of the piano. Composers represented included Frescobaldi, Kindermann, Byrd, Rameau, and Scarlatti.

Were any improvements to be made, they must certainly concern the rather lengthy "lecture" periods, particularly the opening one which ran forty-five minutes. Not to imply, of course, that these sessions were not informative, but they could have been abbreviated for their informative and entertaining qualities. As a whole, however, the presentation was without damaging that quality. As a whole, however, the presentation was

Warriors defeat Eau Claire in doubleheader

by Mike Loeschke

The Warriors improved their record to 10-4 Monday afternoon with two victories over Eau Claire State University. With the four victories against the University of Wisconsin, Milwaukee, Friday and Saturday, they are now looking for NIC action this weekend against St. Cloud State.

On Friday the Warriors had an easy time winning the first game 13-3, with Brian Ojampa collecting a 7-2 win. Loren Benz was the leading hitter for the day going 5 for 9 including two home runs.

The winning ways continued on Saturday as they took two more from UWM. Steve Krinke hunched a shutout in the first game to win 9-0. In the second game, Lee Roelker, a junior right-hander, not only pitched a shutout but a no-hitter as well and was a tight one 1-0. Eau Claire State University was Winona's next victim. In the first home game of the season the Warriors collected a 43 victory on a three run third inning. Todd Spencer went the distance for the win and Bene and Bathwell homered.

Winona will play one game on Friday and Tuesday on Saturday against St. Cloud to open conference play. Both games are home. Friday's game starts at 3:00 p.m. and Saturday's double header begins at noon. Both games will be played at Gaybrych Park.

Most people feel that St. Cloud has one of the top teams in the league this year, so this weekend is important to the Warriors' title hopes.

Most people feel that St. Cloud has one of the top teams in the league this year, so this weekend is important to the Warriors' title hopes.

The spring quarter athletic program is underway at WSC.

The co-rec volleyball program has 20 teams competing. They are divided into three leagues from which the championship will be decided. There are 13 intramural softball teams organized.

The pool is open for anyone interested in swimming. Tuesday and Thursday are swim nights and Wednesday nights are reserved for girls.

Extramural softball and tennis teams began practice for the coming season.
