Insure Your Future Business

Advertising is simply Business Insurance. Your advertisement of today and tomorrow should have a broader scope than just a name and address. It should produce sales. It should build and not attach itself to the product. It should be a part of the foundation on which you build your future.

Just because you may have some business that you can handle today is no reason why you should not advertise. There may come a time when you will not be overburdened with work and will be able to get by, but you have not built a foundation of goodwill and confidence in your store when you had the chance.
