Three killings, chain of bombings break truce

BELFAST (AP) - A bomb-trap attack on the home of a religious war leader early today in the northwest of Northern Ireland killed an 80-year-old Roman Catholic priest and injured a main Protestant neighbor. The attack was linked to the Saturday night bombing of a Catholic church in the city of Derry.

Vietnam attack

U.S. B52 bombers have been pounding targets in eastern Cambodia and as many as 200 North Vietnamese troops were reported in the five-day-old South Vietnamese drive into eastern Cambodia; destruction of the headquarters of a major North Vietnamese Army division was reported.

Busing issue expected to aid Wallace

WASHINGTON (AP) - For Sen. Edmund Muskie meets with a group of national leaders to discuss the issue of busing yet another hook, this one about his role in the nationwide controversy over the issue of busing. Muskie, a potential winner, Alabama Gov. George C. Wallace the past week but is still on the ballot. Wallace, who has campaigned in Florida the past week, is poised to win the second test of his campaign against a proposed referendum from being included on the ballot, but the governor has said he will resist efforts to appeal the decision.

Religious war

The religious war in South Vietnam's Mekong Delta is the most important event of the week. The war has now entered its fifth year, and the fighting continues to escalate. The United States has increased its military involvement in the war, and many believe that the outcome could determine the future of the country.

General election

The upcoming general election in the United States could provide a crucial test of the busing issue. If the issue is shown to be divisive and不利于 any one party, it could help elect Blaine. If the issue is shown to be popular, it could help elect Caine.

In Florida primary: a place to learn for Democrats

Florida primary: a place to learn for Democrats

Winston Churchill, the former British prime minister, said today that the busing issue is "a place to learn for Democrats." He added that the issue is "a place to learn for Republicans," as well.

In settlement of IT&T suits

Mitchell expected to deny role

The U.S. Justice Department has reached a settlement with IT&T in a case involving the company's proposed acquisition of a major telecommunications services firm.

In the settlement, IT&T agreed to pay a $50 million penalty and to restrict its activities in certain areas. The settlement also allows IT&T to retain its current management team.

Busing issue expected to aid Wallace

The busing issue has been a major factor in the Republican primary race. In the Florida primary, Sen. Edmund Muskie, who has been leading in the polls, is expected to benefit from the issue.

Mitchell expected to deny role

Sen. Robert C. Byrd, who has been leading in the polls, is expected to be denied by the board in the case involving IT&T.

In settlement of IT&T suits

Mitchell expected to deny role

Sen. Robert C. Byrd, who has been leading in the polls, is expected to be denied by the board in the case involving IT&T.

Wallin is indicted for conspiracy

M. D. Wallin, Winona, was indicted on a charge of conspiracy for his involvement in a bank robbery scheme. The charge resulted from a federal investigation of the Winona Senior High School and the two new buildings constructed for the school. The charge is based on the alleged involvement of M. D. Wallin in a plot to rob a bank in the Winona area. Wallin is expected to appear in court for his arraignment.

Preliminary action on contract matters taken

Board sets hearing on reapportionment plan

A change order providing for the addition of new facilities at the Winona Senior High School has been approved. The order provides for the addition of new classrooms and a new gymnasium. The change order was approved by the Winona School Board and is expected to be completed by the end of the school year. The new facilities are planned to be ready for use in the fall of 1961.

Order Winona-Minneapolis sewerset linkup

Winona and Minneapolis officials were hopeful on Monday by the time the two cities settled on a plan for linking their sewers. The plan was negotiated by the two cities and is expected to be completed by the end of the year. The plan involves the construction of a new sewer line to link the two cities and is expected to provide a more efficient and safer means of waste disposal for both communities.

Independence man arrested for giving aid to kidnappers

Joseph L. Hille, 31, of Independence, was arrested Monday in connection with a bank robbery and an attempted murder. Hille is accused of providing aid to the kidnappers of a 17-year-old Eau Claire youth last week. Hille is expected to appear in court for his arraignment on Monday.
No signs of quick development in open trade with Red China

By MILLES A. SMITH

NEW YORK (AP) — Present prospects of opening up trade with red China are not very promising. The United States and the Chinese government are in a trade deadlock.

The Chinese government is very suspicious of the American moves. They do not wish to be tricked in any way. They are afraid of the American intentions. They do not want to make any compromises.

The United States government is also very suspicious of the Chinese moves. They do not wish to be tricked in any way. They are afraid of the Chinese intentions. They do not want to make any compromises.

The Chinese government is now demanding that the American government should make some concessions. They want the American government to relieve some of their economic pressure.

The United States government is now demanding that the Chinese government should make some concessions. They want the Chinese government to relieve some of their economic pressure.

Wallace's bid for bigger piece of party action

On the expectation that Governor Wallace of Alabama may be the boostercane for Per- son's presidential primary, every Democrat is watching intently those who do not wish him well — how he will do against the others. The results are in advance.

Now our Florida is not to be a minority of the nation. Nor is it in Florida. In every state, whether large or small, there is a Democratic party — a party of the party. In fact, the national party is a party of stronger men and women, that can't act without their votes. But if they do they have in their hands.

SHOULD THE people who are to determine who will be President be treated as if they are in a sordid and well-informed party? And if so, how do we get them to see that our nation is in all of 50 states?

Peter. Yes, we have some idea of what's happening in the world. We are aware of the need to meet without "severe" adverse effects on industry or the national economy. We know that federal standards for abating air and water pollution would be met without "severe" adverse effects, either on industry or the national economy.

JOHN ATLAS, Brian, you've written an article for The New York Times on the need to meet these standards. It comments that the President and his advisors have frequently said that he's primarily interested in changing the Democratic party, and that the twisting and turning of the presidential aspirants in Florida in response to his appeals are an indication he may be enjoying partial success. — A.B.

The governor has frequently said that he's primarily interested in changing the Democratic party, and the twisting and turning of the presidential aspirants in Florida in response to his appeals are an indication he may be enjoying partial success. — A.B.

Rockefeller in cabinet?

One of the daily press of mass editors is to be chosen between two reports of the same event. Many times this is not a pretty task. One may, in his opinion, be better written, or it may be so written as to make it difficult for the reader. But, as in the present article, a choice may be made, and it only the opening paragraphs are said.

**Limitation on guns suggested**

People are inclined to react with emotion, rather than examine some cold, hard facts.

Perhaps, the next, "cold reaction" derive from that psychological fact. A substantial majority of persons who attack the police with gunfire are not the victims of the crime. They are the perpetrators of the crime.

People have asked, "But what about the victims of the crime?" And I submit: That part of their constructive effort because such arguments do not attack the immediate problem. The number of people possessing handguns, and that while the number of accidental deaths (most occur in the home) is tragic, the number of homicides involving firearms is much higher. The problem is not that firearms exist, but rather that they are not restricted to just those who can use them responsibly.

As for BENDER'S view, the idea is to save lives, not to wipe out all of the guns. The idea is not to restrict everyday use of firearms, but rather to reduce the number of guns in the hands of irresponsible persons. How many criminals are responsible for the vast majority of U.S. homicides? Is the number of such criminals decreasing? If so, then why are we restricting the gun rights of responsible citizens in order to protect a small number of criminals?

The guns are just as lethal as any other weapon (Mr. Eeyerstedt would add ice picks, and where there are fewer guns, there is less violence in American life). The solution to the gun problem is not to restrict the use of guns, but rather to restrict the use of guns by irresponsible persons.

Ron Everson: first for the second time.

As for school busing, I cite these statements in agreement with Mr. Beyerstedt that the U.S. are asking guns, they are used in three-fourths of violent crime in the U.S. and Canada. The National Commission on the Causes and Prevention of Violence, chaired by Dr. Milton S. Eisenhower, which refutes many of Mr. Beyerstedt's contentions; e.g.,

**How to keep secretary happy**

Art Buchwald

Write this to the editor of the newspaper that is a subscriber to the Minneapolis Star and Tribune:

**Mondivi gets new city assessor**

Mondivi, Wis. (AP) – U.S. city officials have appointed Pat Mondivi to serve as city assessor. He has served in this capacity for 17 years.

Mondivi met the requirements of the City Code for city assessor. He has lived in the city for six years.

A refusal by Edward Littner, who had been city assessor, to accept the appointment was accepted. Peterson has been with the city as city assessor for three years.

The new assessor was appointed by the City Commission. The appointment was made by the City Commission with the approval of the City Council.

**Ron Evenson: first for the second time.**

Ron Evenson was named first for the second time.

Apple, for the second year in a row, Ron Evenson of Lutheran Brotherhood has been named best city assessor among Lutheran Brotherhood's agents.

As a member of the David Ax Agency in Austin, he is part of a team of nine agents of the group who are dedicated to bringing the benefit of insurance to Lutherans in the United States and Canada.

"Ron, you're a great person and thank you, Ron, for your outstanding service to the Lutheran Churches in the area."

Lutheran Brotherhood

**neighbors**

Having good neighbors makes life a lot more fun. And helpful, too. Good neighbors are typical throughout the United States. Whether you need a hand with a mower and a lemonade, or in their daily business, the hard work and willingness to help is one another shown through.

The NSW people who serve here to be good neighbors too. They work and stay close by, they're active in community affairs, and NSW neighborhoods includes a responsible everyday effort to make sure you have adequate social environment facilities, both now and in the future.

Here's ways NSW could be a better neighbor. Ways you haven't thought of. Call or write us anyway. New ideas are welcome.

Wisconsin Supreme Court asks solons to put aside roadblock

MADISON, Wis. (AP) - The Supreme Court said it could hear boundary disputes between two areas of the state only if the boundary commission had not completed its work by April 17.

If the legislature cannot act by the 17th, the court said Monday, the court "will have a decision to make" regarding the role of the state Supreme Court in reapportioning districts.

The court said the legislature had no authority to create a special session for the purpose of reapportioning districts.

The initiative was led by Attorney General Phil Klopfer, who argued that the legislature had no authority to call a special session to restructure the state's legislature for the purpose of reapportioning districts.

The court said the legislature had no authority to create a special session for the purpose of reapportioning districts.

The initiative was led by Attorney General Phil Klopfer, who argued that the legislature had no authority to call a special session to restructure the state's legislature for the purpose of reapportioning districts.

Board reaffirms group home commitment

The Winona County Board of Commissioners will support a group home for emotionally disturbed children in Trempealeau if it is approved by the Minnesota Department of Social Services. Commissioners have consistently supported the project, even though they have previously indicated some reservations. Commissioners have clarified their support for the project by reaffirming their commitment in a letter to the Minnesota Department of Social Services.

Spanish Club trip to Mexico OK'd

Approval of a trip to Mexico for 130 members of Dr. C. K. Schoen's Spanish class at Winona High School was granted by the Winona Board of Education. The trip was planned to coincide with the school's Spring Break and will allow students to visit various sites of historical and cultural significance in Mexico.

Motorcycle riding class is approved by board

Establishment of a motorcycle riding class was approved by the Winona Board of Education at its meeting on March 12. The class will be offered to Winona High School students and will be taught by a qualified instructor. The main objectives of the class are to teach safe riding practices and to promote responsible riding behavior.

Traffic plan for downtown wins approval

With one minor dissent, the School Board of Winona approved the Traffic Plan for Downtown presented by the Traffic Department. The plan includes improvements such as expanded sidewalks, crosswalks, and street lights to enhance pedestrian safety and mobility in the downtown area.

Firing of science teacher upheld by board after hearing

With one member dissenting, the School Board of Winona approved the recommendation of the Board of Review that a science teacher, who has been on leave of absence because of illness since September, be dismissed. The teacher, who has been on the staff for 12 years, has been placed on leave due to medical reasons.

Contract terminations of teachers approved

Contract terminations of two teachers were approved by the Winona Board of Education at its meeting on March 12. The terminations were based on disciplinary issues and the teachers have been given opportunities to appeal the decisions.

DEAR ABBY: Here is the situation: There is an obvious pre-arranged commencement school girl who is convicted of stealing.

The principal called her in and asked her to attend evening classes. The girl refused and swore at the principal and continued her uncooperative behavior. Should the principal do anything more, or should he attempt to get her to attend classes?

Sincerely yours,

[Name]

DEAR PEOPLE: The only problem at this point is what to do if the teacher walks. They may adopt a policy of waiting for the principal to arrive and then reporting the student.

DEAR ABBY: My husband is 35. He has been a logger for the past 15 years. As of last month, he was laid off.

He has been unemployed for two months, and the family budget is tight. He has been looking for work without success. What can we do to help him find a job?

Sincerely yours,

[Name]
Before You Buy... By Margaret Dana

What are hazards of excessive noise?

A recently completed survey for Consumers Digest of all 1001 country residents are invited to two noise complaints in the last two years. The survey is being conducted to determine the kind of "all-or-nothing" approach to noise control. Indeed, the situation in the United States is a matter of great concern to many people, particularly those who live in cities and towns with heavy traffic. In the New York area, for example, there are an estimated 10 million people who are affected by noise pollution. The survey shows that noise is a major problem in the United States. In fact, it is estimated that 50 million people are exposed to noise levels that are considered harmful. The survey also shows that noise pollution is a serious problem in many other countries. In France, for example, it is estimated that 8 million people are exposed to noise levels that are considered harmful. The survey shows that noise pollution is a serious problem in many other countries. Random Ramblings

By STAN SCHMIDT, Sport Editor

Just not in the cards

Basketball is often an unpredictable sport. The cards for Wisconsin teams have been most unkind in the recent past.

Pat McGuire didn't know it at the time, but Marquette's loss to St. Thomas was nothing but an accidental blow to the NCAA tournament should the Golden Eagles win the Big Ten.

The season didn't start off too well. Pat McGuire said he thought reinstatement was 'a little bit of a moral principle and a personal inconvenience' for the Golden Eagles. 

But the same two statistical blocs are not going to change. "It's a new ball game,' Pat said.

By GLEN FEORBACH

Blugolds, Toms cop first-round victories

ROCHESTER, Minn. - Both Gustavus and Hamline remained unbeaten in the MIAC as the conference tournament started.

The Gusties crushed Concordia, Minn., 86-69, to advance to the championship game. Wartburg, Iowa, and Concordia, Minn., advanced to the tournament semifinals with an 85-68 victory over Northfield, Minn., and 85-68 against Winona, Minn., respectively.

The Toms, 18-2 overall, beat the Ramblers, 74-62, to advance to the tournament championship game.

By RAY WEIDNER

Turner is named to All-Big 10

Blugold star Pat Witwen of St. Mary's was named to the All-Big 10 team, according to the Associated Press.

His selection to the team was announced Tuesday by the AP's Midwest bureau. 

The Associated Press also announced that the Blugolds, 18-2 overall, were the Big 10 champions for the second year in a row.

Also, the Associated Press announced that the Blugolds were the No. 1 team in the Big 10 for the second straight year.

By JIM ROGERS

Also cops scoring title

Witlen, a 6-5, 18-year-old from Chicago, was named the Big 10's leading scorer.

He leads the league in scoring with 26.3 points per game, ahead of Minnesota's reconcile player, who leads the league in scoring with 25.2 points per game.
