Technical debriefings continue

Scientists get first look at highland rocks

By HOWARD BERNSTEIN

The return today of astronauts from their 11-day mission to the moon was marked by the release to the press of the first technical debriefing observations. These reports may be the most significant revelations from the Apollo 16 trip to the moon, for they contain the first information about the highland rocks brought back from Gruenervald, a site selected by the astronauts for a lunar geologist’s study of the early history of the moon.

The highland rocks collected by Apollo 16 are the first pieces of moon rock to be brought back to earth for study by a scientific team that has spent years analyzing samples of the moon’s surface brought back from previous missions. The scientists, who have been studying the samples since they were brought back to earth, have been able to identify several new minerals and even new types of rocks that were not previously known to exist on the moon.

In the most significant, the most revealing statement, scientists have identified a new type of rock that they have named the “Gruenervald facies.” This rock is characterized by its high iron content and its abundance of feldspar, a type of mineral that is not commonly found on the moon. The scientists believe that the Gruenervald facies is a type of volcanic rock that was formed when the moon was much younger, and that it provides evidence for the moon’s early history.

“The Gruenervald facies is a type of rock that we have never seen before,” said Dr. Jane Brown, a geologist at the University of Arizona. “We believe that it was formed when the moon was much younger, and that it provides evidence for the moon’s early history.”

The scientists have also identified several other new types of rocks that they have named after the sites where they were collected. These include the “Cruikshank facies,” a type of rock that is high in calcium and aluminum, and the “Howell facies,” a type of rock that is high in iron and magnesium.

The scientists say that these new types of rocks provide important clues about the moon’s early history and its evolution. “These rocks are the first pieces of the moon’s early history that we have been able to study,” said Dr. Brown. “They provide important clues about the moon’s early history and its evolution.”

The scientists are now working to identify the sources of these new types of rocks and to determine how they were formed. They hope that their findings will help to shed light on the moon’s early history and its evolution.

In the past, the moon’s early history has been a matter of great debate among scientists. Some believe that the moon formed from a disk of material that was surrounding the earth, while others believe that it formed as a result of a collision between the earth and a large planet. The new findings from Apollo 16 provide important clues about the moon’s early history and its evolution, and they may help to resolve some of these long-standing debates.

The scientists are now working to identify the sources of these new types of rocks and to determine how they were formed. They hope that their findings will help to shed light on the moon’s early history and its evolution.

Several changes
Draft registration procedures continued.

New draft registration procedures were

implemented, resulting in a

change in the system of registration, which

had been governed by local registrars. The

new system, under which registrants were

required to register in person, was intended to

provide a more accurate and up-to-date

record of the draft population. Under the

new system, registrants were required to

complete a registration form and present it

to a local registration board.

In forming new reap map plan

Judges will waste no time

By THE ASSOCIATED PRESS
A panel of judges will waste no time in trying to hammer out a new reapportionment plan for Minnesota, according to the majority member of the panel.

U.S. District Judge in Minneapolis Judge Henry Klein said the three-judge panel in Milwaukee has a "moral obligation" to rush to complete its work.

"We've been on special merit, mission," said Judge Klein. "We have to get our job done now.

Several options open to the panel.

The panel could draw a new reap map plan for the existing 67-member Senate and the 134-member House of Representatives.

He said the three-judge federal panel was faced with a "massive task." He said the panel should have "nothing to do with politics" and that it must act "at the speed of light." He said the panel must "get its work done now.

"It's not a question of whether or not we can do it," he said. "It's a question of whether or not we want to do it.

"We will proceed as quickly as we can," he said.

"We will proceed as quickly as we can," he said.

The importance of having money

Stevie Mallory's withdrawal from the president's race has sparked a discussion about the value of money in politics. Some argue that money is a necessary tool for campaigning, while others believe that it undermines the democratic process.

"If you want to change the policy, you have to change the President. This is only one way. It's not a panacea. It's not the answer to this. But it's a way to do it."

When will we hear from Moscow?

"The President has a lot of true friends. There are a lot of people who support him. There are a lot of people who don't support him."

Nixon's office

"We will not seek in this campaign to label any special area of distrust or any kind of a suspect. We will not."

Fear in the city

"It is a big city with a lot of energy. It's a place where people love to live."

An amendment is no way to settle the busing issue

"We have to find a way to make this work. We have to find a way to make this work."

School financing to high court

"We have to find a way to make this work. We have to find a way to make this work."

Football's top 10

"We have to find a way to make this work. We have to find a way to make this work."

To the editor

A proposal for a permanent preservation unit

Historic preservation is becoming more and more urgent in many of our cities. Back in the early 1950s there was a tremendous drive to renovate our old historic buildings in many communities. In many of our historic cities the area is empty of people, the population has significantly declined. A small group of people in many of these communities is trying to bring the dedication of the historic preservation effort to all of the real good of our country and areas of our past.

One notable project that I had an opportunity to study extensively was the City of Annapolis, Maryland. The city, known for its historic architecture, was facing the prospect of losing some of its most significant buildings due to neglect and lack of resources. In 1954, the city government created the Historic Annapolis Commission, which was responsible for the restoration and preservation of the city's historical buildings.

In this project, the city was able to involve local volunteers and community members in the preservation effort. The commission worked closely with owners and developers to ensure that the character of the historic buildings was maintained.

The commission was successful in preserving many of the city's historic buildings. The unique blend of volunteers and community members helped to ensure that the historic buildings were being protected and preserved for future generations.

The preservation effort in Annapolis was not only limited to the city. Other communities also faced similar challenges in preserving their historic buildings. However, the approach taken by the City of Annapolis is a great example of how communities can come together to preserve their historic buildings and their rich history.

The preservation effort is still ongoing, and the city continues to work on preserving its historic buildings. The City of Annapolis is a great example of how communities can work together to preserve their history and ensure that it is not lost.

Art Buchwald
Expectant moms, don’t let ‘old hens’ scare you

DEAR ABBY: I have seen some good for full husband who was not very consistent with money. As a result, by the time he told her, he was running out of cash and I doubt she knew how he would make ends meet until after he left.

Dear Abby: About that girl expecting her first baby and trying to get her money together. It will be much easier than expected. When I was pregnant and trying to get my money together, I had a hard time. I didn’t like the old lady’s advice.

I think the best advice for anyone trying to plan a wedding is to avoid any debt. Get your money all together before you even start thinking about the wedding. It will be much easier and less stressful for both of you.

Love and Marriage. 200 letters. 200 answers. All an expert’s analysis of how to stop your love life from going wrong, and how to keep it going right. This is the book that you have been waiting for. It is the book that will show you how to use the art of love. How to get what you want from love and how to keep what you have. It is the book that will show you how to use love as a weapon. How to use love as a tool. How to use love as a weapon.

The book is filled with tips and advice on how to get what you want from love. It is filled with stories of real-life relationships and how they were made successful. It is filled with advice on how to keep a relationship going.

Love and Marriage. 200 letters. 200 answers. All an expert’s analysis of how to stop your love life from going wrong, and how to keep it going right. This is the book that you have been waiting for. It is the book that will show you how to use the art of love. Get your money all together before you even start thinking about the wedding. It will be much easier and less stressful for both of you.

Mr. and Mrs. Donald Nariss

111 East Main Street

Lanesboro, Minnesota

Couple honeymoon on Isle of Capri

The Cathedral of the Sacred Heart in Lanesboro, Minn., served as the scene of the marriage of Miss Merylann J. Nariss and Mr. Donald S. Nariss, four months ago.

Miss Merylann J. Nariss and Mr. Donald S. Nariss, both of Lanesboro, were married at the Cathedral of the Sacred Heart in Lanesboro, Minn., on April 22. The bride is a graduate of St. Mary’s College, is employed by Peat, Marwick, Mitchell & Co., and has received an estate from the United States of America, and has been worth it. You should see my beautiful baby boy!

The reason so many women fear childbirth is because they are so scared. The in-laws scared me to death. They were even taken on a tour of the hospital to see the labor and being frightened by old ladies who told her how rough it was.

The reason so many women fear childbirth is because they are so scared. The in-laws scared me to death. They were even taken on a tour of the hospital to see the labor and being frightened by old ladies who told her how rough it was.

Dear Abby: Dear Abby, I have a friend who is pregnant and she is scared. She is afraid of giving birth. She is scared of the pain. She is scared of the bleeding. She is scared of the gas.

Dear Abby: Dear Abby, I have a friend who is pregnant and she is scared. She is afraid of giving birth. She is scared of the pain. She is scared of the bleeding. She is scared of the gas.

Arcadia High will lose six teachers

ARCADIA, Wis. — In addition to the retirement of teacher Mrs. Caroline Bambenek, who has taught biology at Arcadia High School, six teachers are resigning. They are Jerry Johnson, Gary Donahue, Robert Soltow, and Terri Ehlers. Mrs. Soltow announced her resignation to the local press while Mabel High School and Concordia College, which included 600 scouts. The evening will be held under the leadership of the Boy Scouts and will feature a program including songs, dances, and skits. The program will be open to the public and admission will be free.

Other activities included: hikes to the new reservation areas, camping, and tours of local areas. Flags, patches, headbands, and ribbons were distributed to the scouts

The women were honored for their many years of service at the Watkins Methodist Home. They were given a dinner and a presentation of the history of the home.

Mr. and Mrs. Herbert Rod, Mason City, son of Mr. and Mrs. Vincent Bambek, are announcing the engagement of their daughter, Rosalyn, to Paul Soltow, who is employed by the Town of Arcadia. The couple will be married on May 15.

The Very Rev. Edward J. Sobottke officiated. Kathy Sonsalla, Mrs. Herbert Rod, Mason City, sister of the groom, was first to introduce the bride. flower girl committee that planned the day's events.

St. Martin's PTL elects officers

The daughter of Mr. and Mrs. Bowman, left, presented memberships to the Social Services at Central United Methodist Church.

New officers elected at the April meeting of St. Martin's PTL were: Mrs. Elsa L. Kristensen, president; Mrs. Grace L. Hinckley, treasurer; Mrs. Grace L. Hinckley, secretary; and Mrs. Grace L. Hinckley, treasurer.

Florida law that gives widows tax break outlawed

MINN. (AP) - A Senate bill in Minnesota to give widows a tax break if their husbands died in the line of duty has been declared unconstitutional by Circuit Judge Thomas De Leenstal. He said the measure 57-0-11, sponsored by Rep. Mel White, failed to satisfy the constitutional test of being a public benefit and was declared invalid and void.

Three new house permits are drawn

Winnipeg, Man. (CP) - Three new house permits were issued in Winnipeg, Man., today. The permits were for homes on University Avenue, Avenue de la Reine, and Avenue de la Montagne. The homes will be built by Best-Bilt Homes, Box 24, Winnepeg, Man., and the contractor is Mr. J. J. Whelan. The cost of each home is expected to be around $30,000. The permits were issued by the city's planning department.

Plainview Legion wants to change membership rule

PLAINVIEW, Minn. (AP) - The problem for a small group of American Legionnaires in Plainview, Minn., is how to make themselves more appealing to younger members.

The post, No. 322, has been full of members for many years. But the post and the district it represents have seen a drop in membership in recent years.

Post Commander Jack Petersen said the post is trying to attract younger members by changing the rules and offering more activities. The post is also looking to increase its visibility in the community.

The post, which has been in operation for over 70 years, is located in a small town in Minnesota. The post has a long history of serving veterans and their families, and it has been a source of pride for the community.

The post is facing competition from other organizations in the area, and it is trying to find ways to stand out.

The post has been active in community service and has been involved in various events and activities throughout the years. It has also been a source of support for veterans and their families.

The post is currently discussing changes to its membership rules and is working on ways to increase its appeal to younger members.

WSC physics students at atomic site

Six Winona State College students and their physics professor are in Chicago today through Thursday for a physics conference.

The students, all seniors at the college, are attending the American Nuclear Society's annual meeting in Chicago. They are part of a group of 25 students and their professor who are presenting a paper on their research.

The students, who are studying physics and engineering at the college, are working on a project to develop a new method for analyzing data from atomic experiments.

The students are also participating in a series of workshops and seminars on various topics related to physics and engineering.

The conference is an opportunity for the students to network with other students and professionals in the field, as well as to present their research and learn about the latest developments in the field.

Humphrey wins 6 of 12 convention delegates

Winona, Minn. — Democratic presidential candidate Walter F. Mondale has won four convention delegates here today, bringing the total number of delegates he has won to 12.

Mondale's victory comes after a close race with his main rival, Michael Dukakis, who won two delegates.

The convention is being held at the Winona Convention Center and is expected to continue through the end of the week.

Mondale, who is seeking his third nomination, has been campaigning heavily in the state, hoping to win the support of voters and party leaders.

The convention is expected to be a key test for both candidates, as it is one of the few remaining states in which they are still competitive.

Rushford airman supports Apollo 16 space mission

HUMPHREYS, Minn. — Airman 1st Class Greg L. Wolpert, son of Mr. and Mrs. Laurence Wolpert, has completed a nine-week space training course at what is being called "The World's Most Expensive Parental School." According to the airman, who has just returned from the training course, it is the most expensive educational program for civilians that he has ever encountered.

While there, the airman participated in a variety of space-related activities, including spacewalk training, zero-gravity simulations, and a tour of the International Space Station. He said the program was designed to give civilians a taste of what it is like to live and work in space.

"I've always been fascinated by space," the airman said. "I've been watching NASA space missions since I was a kid. But this program was the closest I've ever come to experiencing space firsthand."

The airman said he was particularly impressed with the zero-gravity simulations, which allowed him to experience what it's like to be weightless in space. He added that the spacewalk training was especially challenging, as it required him to wear a space suit and perform tasks while suspended in the air.

"I think this program is a great way for civilians to learn more about space exploration," the airman said. "It's also a great way to prepare people for future space missions, as it provides them with a hands-on experience that they can use to help design and develop new space technologies."

The airman said he plans to continue his education and training in the field of space exploration, and hopes to one day become a professional astronaut. He added that he is grateful for the opportunity to participate in this program, and believes it will help him achieve his dreams of one day exploring the stars.
Relief shines as Twins split with Yankees

NEW YORK (AP) — Bill Ripken and the Baltimore Orioles turned their respective new-balls up at Yankee Stadium and didn't mind what they saw.

"Not to be outdone, maybe it's not perfect," said Mills, "but we've got the win today." Other teams might be on top, but the Los Angeles Dodgers, acquired by Columbia, scored and went on to win their 26th game ahead again, this time scoring only two runs in the victory.

The two teams had split their seven-game series, but it was the Dodgers who benefited.

The two teams split their seven-game series, but it was the Dodgers who benefited.

The Dodgers scored twice in the first period on a single by Dave "Biceps" and then added a pair of singles by Phil "Put-Away" in the second. The Twins scored three runs in the fourth, thanks to a two-run single by Bill "Snapping" and a sacrifice fly by Steve "Youngblood" in the fifth.

But the Twins hung on, trailing 5-0 into the seventh inning before scoring four runs off reliever "Old Timers" in the eighth. The Twins scored three runs in the ninth off reliever "Big Arms" before trailing 8-5 into the bottom of the ninth.

Winona State stumbles before UW-La Crosse

WINONA STATE (AP) — Winona State's hopes to win its third straight game were dashed when the Lakers scored in the ninth inning on a single by Dave "Biceps" and then added a pair of singles by Phil "Put-Away" in the second. The Twins scored three runs in the fourth, thanks to a two-run single by Bill "Snapping" and a sacrifice fly by Steve "Youngblood" in the fifth.

But the Twins hung on, trailing 5-0 into the seventh inning before scoring four runs off reliever "Old Timers" in the eighth. The Twins scored three runs in the ninth off reliever "Big Arms" before trailing 8-5 into the bottom of the ninth.

Winona State's hopes to win its third straight game were dashed when the Lakers scored in the ninth inning on a single by Dave "Biceps" and then added a pair of singles by Phil "Put-Away" in the second. The Twins scored three runs in the fourth, thanks to a two-run single by Bill "Snapping" and a sacrifice fly by Steve "Youngblood" in the fifth.

But the Twins hung on, trailing 5-0 into the seventh inning before scoring four runs off reliever "Old Timers" in the eighth. The Twins scored three runs in the ninth off reliever "Big Arms" before trailing 8-5 into the bottom of the ninth.

Brett doesn't finish, but starts Brewer rout

By MIKE GREEN

The Associated Press

A.T.'s home run off of Bob Kuhn Thursday night turned into a 20-3 rout.

Winnipeg's Bob Adams became the 12th player in major league history to hit for the cycle this season.

Adams, a 25-year-old infielder, had three singles, a double and a home run in the second inning against the New York Mets.

The Associated Press

Adams drove in all four runs for the White Sox in their 20-3 win over the New York Mets Thursday night.

He homered in the second inning and had three singles and a double in the first three innings.

The Associated Press

Adams hit a grand slam in the first inning and had three singles and a double in the second, third and fourth innings.

The Associated Press

Adams hit a two-run home run in the first inning, a three-run home run in the second, a three-run home run in the third, and a solo shot in the fourth.

The Associated Press

Suggest 'Poison' signs for polluted streams.

**STEVEN POINT, Wis. (AP)** — The Wisconsin Wildlife Federation has suggested signs to be posted near polluted streams, warning of possible harm to wildlife and humans.

The suggestion was made by officials of the federation, who said the problem is becoming more serious. The federation recommends posting signs near streams where the fish kill is occurring, warning people not to touch or eat the fish, and to report any pollution to the nearest wildlife office.

The noon Dow Jones average was up 20 points at 1.474 as of 1:00 p.m. Declines led advances in the New York Stock Exchange. Analysts attributed the market's rise to speculation about the communist offensive in Indochina and rumors of a meeting of the communist leaders of the three Vietnams. The market rose sharply Fri- day, closing at 1,472.45.
