McGovern strong favorite to win California primary

By CARL P. LEIBSCHEID

WASHINGTON — Democratic presidential favorite George McGovern is the strong favorite to win the California presidential primary today, according to the latest polls. The Democratic nomination fight is expected to be a close one between McGovern and his nearest rival, Sen. Edward W. Kennedy, D-Mass., but McGovern is expected to emerge victorious.

McGovern has been a consistent favorite in California, where he has strong support among Democratic voters. His campaign has been focused on issues such as the environment, civil rights, and foreign policy, and he has been particularly successful in areas with large urban populations.

Kennedy, on the other hand, has struggled to gain ground in California. His campaign has been criticized for being too centrist and not offering enough of a contrast to Republicans. Although he has a strong ground game in the state, his appeal to younger voters and those who are disillusioned with government has been limited.

The outcome of the primary could have a significant impact on the Democratic nomination race. If McGovern wins, it will boost his momentum and put pressure on Kennedy to step up his game. On the other hand, if Kennedy wins, it could give him a boost in momentum and credibility.

The winner of the California primary will likely have an advantage in the upcoming primaries in other states, but the race will continue to be competitive. The Democratic nomination race is expected to be a long one, with the winner likely emerging in the summer or early fall.

Explosions strike in Rhodesia

468 miners feared dead

By DAN WILCOX

Winnipeg Free Press

WINNIPeG, Minnesota, May 29, 1972

A bomb explosion this morning at a coal mine near Winnipeg has killed 468 miners, according to初步 estimates. The mine is owned by the state-owned Consolidated Coal Company, which has been struggling with labor disputes in recent months.

The explosion occurred in the underground workings of the mine, which is located in a remote area of the state. The cause of the explosion is not yet known, but it is believed that it was caused by methane gas.

The blast was the worst in the state’s history and has left the mining community in shock. The Governor has declared a state of emergency and has called for an immediate investigation into the cause of the explosion.

Lawyers say arms limitations can't be achieved in a single treaty

By RICHARD DUNN

Washington Post

WASHINGTON — Lawyers say that arms limitations cannot be achieved in a single treaty, but that a multilateral approach is necessary.

The lawyers were speaking at a conference on arms control, which was held at the Washington Post. The conference was attended by representatives from the United States, Russia, China, and several other countries.

The lawyers agreed that arms control is a complex issue that requires a comprehensive approach. They said that a single treaty is unlikely to be effective, and that a multilateral approach is necessary to achieve meaningful arms reductions.

The lawyers also said that the United States needs to be willing to make concessions in order to achieve meaningful arms reductions. They said that the United States should be willing to agree to reductions in nuclear weapons, but that it should also be willing to agree to reductions in conventional weapons.

The lawyers said that the United States should also be willing to agree to reductions in chemical and biological weapons, and that it should be willing to agree to reductions in antimissile systems.

The lawyers said that the United States should also be willing to agree to reductions in nuclear weapons, but that it should also be willing to agree to reductions in conventional weapons.

Legislative organization group OK's six percent pay hike for lawmakers

Missoula, Mo. — The Joint Committee on Legislative Organization endorsed a six percent pay hike for lawmakers after a special session of the legislature ended in a moratorium.

“For personal use, only. Not editorial, commercial, or marketing use.”

The group, which includes representatives from both the Senate and the House, voted unanimously to approve the pay increase. The move follows a request from Governor Steve Bullock, who expressed concern about the state’s ability to attract and retain qualified candidates for the legislature.

The legislation includes a provision that the pay hike will be applied retroactively to employees who were hired before the new session of the legislature began. This means that employees who were hired after the session began will not receive the pay increase.

The Joint Committee on Legislative Organization is a bipartisan group of lawmakers who are responsible for setting the salaries of legislative employees. The group is made up of representatives from both the Senate and the House of Representatives.

The pay hike approved by the Joint Committee on Legislative Organization is the largest increase in pay for lawmakers in recent history.

The move was praised by Governor Bullock, who said it was necessary to ensure that the state’s legislative branch is able to attract and retain qualified candidates.

“I do not believe that it is in the best interest of the state to have a legislature that is not able to attract and retain qualified candidates,” said Governor Bullock. “We need to ensure that our lawmakers are paid a fair wage so that they can live comfortably and provide for their families.”

The Joint Committee on Legislative Organization is scheduled to meet again in a few weeks to consider more pay hikes for lawmakers.
Taxpayers protest real estate valuation moves

At a news conference Friday, Taxpayers' Protective Association (TPA) leaders called for a leveling off of property assessments.

"We've been fighting against this trend for years," said TPA President John Johnson. "This year, we're seeing a significant increase in property values, and we believe the assessment process is flawed." Johnson said the increase in property values was due to a lack of oversight and transparency in the assessment process.

"The assessment process is a failure," said TPA Vice President Mary Smith. "Property values are being overestimated, and taxpayers are bearing the burden." Smith said the TPA has asked for a review of the assessment process and for more accountability in the decision-making process.

The TPA has been working with local officials to address the issue and has been pushing for a more equitable assessment system.

"We're working with the city council and the county assessor's office to make changes," said Smith. "We're hopeful that we can make some progress on this issue." Smith said the TPA will continue to work with local officials to make sure that property assessments are fair and accurate.

The TPA's concerns were echoed by local residents, who said they were concerned about the impact of the assessment changes on their property taxes.

"I'm concerned about the impact on my property taxes," said resident John Doe. "I don't think the assessment changes are fair or accurate." Doe said he would be monitoring the situation closely and would be willing to take action if necessary.

The assessment changes are expected to have a significant impact on property values in the area, and residents are concerned about the potential increase in property taxes.

"We're concerned about the impact on our budgets," said resident Jane Smith. "I hope the assessment changes are fair and accurate, and that we're not facing a huge increase in property taxes." Smith said she would be monitoring the situation closely and would be willing to take action if necessary.

Local officials have assured residents that the assessment changes are meant to be fair and equitable, and that they will work to ensure that property taxes remain reasonable.

"We're committed to ensuring that property taxes remain fair and reasonable," said Mayor John Johnson. "We understand the concerns of residents, and we will work to address these issues." The mayor said the city council and the county assessor's office would be working closely to ensure that the assessment changes are fair and accurate.

The assessment changes are expected to be implemented in the coming months, and residents are urged to stay informed and to monitor the situation closely.

"We encourage residents to stay informed and to participate in the assessment process," said Smith. "We believe that it's important for residents to have a voice in the decision-making process, and we're working to ensure that taxpayers have a say in the assessment process." Smith said the TPA would continue to work with local officials to address the issue and to ensure that property assessments are fair and accurate.

Wilson duped in New Delhi

BUFFALO, N.Y. (AP) - A 3-foot-9 Nile perch, weighing up to 7 pounds, lives in the waters of the Indian Ocean and is a prized catch for anglers. The fish is known for its voracious appetite and has been compared to the legendary “Sucker” of the Nile. It is believed to be the largest fish species in the world, with some specimens reaching lengths of up to 10 feet. However, this unusual creature remains relatively unknown among the general public and is only recognized by a handful of enthusiasts and researchers. The Nile perch is native to the Great Lakes region of Africa and is known for its striking appearance, with bright blue eyes and a distinctive two-tone coloration. It is a popular target for anglers and is prized for its high-quality meat. However, its numbers are under threat due to overfishing and habitat loss. Conservation efforts are underway to protect this magnificent creature and ensure its survival for future generations. The Nile perch is a symbol of resilience and strength, embodying the spirit of perseverance and determination in the face of adversity. Its presence serves as a reminder of the importance of preserving our natural resources and the need to work together to protect the environment and its inhabitants.

**Angela did get a fair trial**

Although the defendants had suggested that Miss Angela did not receive fair treatment, because her trial lasted three years, and the jury had deliberated for five hours on the guilt or innocence of the defendants, the Defense Attorney, Ms. Lisa Clark, made the preliminary argument to the court that the defendant had been given a fair trial. The court, however, rejected the defense argument, stating that the defendant had been given a fair trial.

**Winston’s own Summit**

William S. White

Winston S. Churchill was a great statesman and an excellent military leader. He was one of the most famous and respected figures in British history. He was widely known as a skilled orator and a brilliant strategist. Churchill was a member of the Conservative Party and served as Prime Minister of the United Kingdom from 1940 to 1945 and again from 1951 to 1955. He was awarded the Nobel Prize in Literature in 1953 for his extraordinary statesmanship and leadership. Churchill was also a famous writer, and his works include *The Second World War* and *The World Crisis*. He died in 1965 at the age of 91.

**Touchdown**

William F. Buckley Jr.

**Nonallied Alliance**

C. L. Sulzberger

The Nonallied Alliance was a term used to describe the countries that were not members of either the Western or Eastern block during the Cold War. These countries included neutral Switzerland, the Philippines, Ethiopia, and Argentina. The term was first used in 1967, and it was later adopted by the United States and other Western countries. The Nonallied Alliance was not an official alliance, but it was a symbol of the growing ideological and economic differences between the two blocs.

To the editor

League didn't ask city crews right question

As a result of developing or destroying an idea or project, it is becoming increasingly necessary for a community to step up to the challenge of change. It is sometimes difficult to imagine that the city could be made more efficient and that the city is not always the most productive in every aspect.

Whether or not the League of Women Voters was in agreement to its present state, there is a question but the evidence points strongly enough that the city could be improved by eliminating the inefficiencies that exist. The city could be made more productive as well.

Easier than any effort to change city government and to make it more efficient, is the need to understand how the city operates and the reasons for its existence.

Understanding the communications of the means of which the city is composed, and the means of which the city is composed, is not difficult but the city could be made more efficient if the city is not always the most productive in every aspect.

The results of any effort to change city government and the need to understand how the city operates and the reasons for its existence, is not difficult but the city could be made more efficient if the city is not always the most productive in every aspect.

Welfare caseload rate still small

NELMAHLE (AP) — Wisconsin continues to have a relatively small caseload rate of welfare recipients, despite a relatively small proportion of its citizens by the U.S. Department of Health and Human Services.

A report being released today by the Office of Federal Assistance Management, the 12th in a series of reports on welfare recipients, shows that Wisconsin has a caseload rate of 8.2%, compared to a national average of 10.4%.

The report also notes that Wisconsin has a higher percentage of aid recipients among its population than any other state, with 4.9% of its population receiving aid, compared to a national average of 3.6%.

Despite this, the report states that Wisconsin has made progress in reducing its caseload rate, which was 10.9% in 2001.

Welfare raise said only a 'token gesture'

MADISON, Wis. (AP) — A welfare raise of only 50 cents a month for nearly 80,000 families in Wisconsin was labeled a "token gesture" by advocates who said it was not enough to help families in need.

The Wisconsin Welfare Rights Organization said it would continue to lobby for a more generous raise.

The state Department of Health and Family Services said Monday it would ask for an additional $20 million to fund the welfare raise, which is the first since 1993.

Praise, threats

Angela deluged by telegrams

By EDITH M. LEDERER

APRIL 27

ANGELA Deluged by telegrams, a spokeswoman for the Minnesota Data Bank said the week was not the only time she had received threats.

"It's not unusual," said Margaret Reilly, a spokeswoman for the bank, which provides computerized data to government agencies.

"(Angela) gets a lot of threats, especially when she's doing something for a significant cause," Reilly said.

"It's not just a matter of her safety," Reilly said. "It's the whole concept of data security."

Dispute unresolved

Council proceeds with curb and gutter program

City Council members voted Monday night to proceed with a planned curb and gutter program, but the order to proceed was overturned by the council because of financial concerns.

Mr. Wilson and Mr. McLean expressed concern that the project would be too expensive. The project would cost approximately $2,000,000, according to Mr. Wilson.

Mayor Langford said that the project would be too expensive and that the City Council should consider other options.

The City Council then voted to proceed with the project, but the vote was overturned by the council because of financial concerns.

Mayor Langford said that the project would be too expensive and that the City Council should consider other options.

taxpayers fight valuation boost

TAXPAYERS fight against a valuation boost this year as the city moves forward with plans to increase property taxes.

Mr. Brown, chairman of the Winona Independent District Board, said that the city's proposed valuation boost would cause a 30 percent increase in property taxes.

Mr. Brown said that the city's proposed valuation boost would cause a 30 percent increase in property taxes.

Hairdressers offer some tips on tipping

DEAR ABBY: I've come to the firm belief that if something in your work environment can be improved, you can do it yourself. I'm seeing lots of small businesses that are struggling to make ends meet even at a time when the economy is doing well. What can I do to make sure my customers are happy with my service and keep them coming back?

DEAR ABBY: I gave my hairdresser a tip of $100 after she cut my hair. She didn't seem very interested in it. Should I have tipped her more?

DEAR ABBY: I couldn't make it without tips. I'd find something else to do.

Losers' bracket tilt today at 1

By STEVE SCHNEIDER
Daily News-Register

Eugene, Oregon — The seeded teams that were entered into the NAIA World Series brackets, along with a few upsets, had a tilt of 1 amulu on Monday afternoon at 1 p.m. The winner of this contest will advance to the next round of the tournament, set for June 14-15 at Midway Stadium in St. Paul.

South Dakota State

The South Dakota State University baseball team, along with several other teams, was able to make a comeback in the opening round of the NAIA World Series. The team was down by a single run in the sixth inning, but was able to tie the game and ultimately win with a walk-off hit in the ninth.

Dragons oust Huskies as NIC All-Sports king

EAST LANSING.—After a herculean effort by Winona State to provide a contest, the Dragons went over the top in the final NIC meeting of the season and became the NIC All-Sports champions.

Winona State was second in basketball and went third in football, baseball, tennis, golf and cross country.

The Dragons wound up third in both basketball and football and second in baseball, tennis, golf and cross country.

Winona State had to settle for fourth in the standings but got a bit of consolation by having five of its six teams end the year with final NIC honors.

The Dragons oust Huskies in NIC Swimming Championship

BEMIDJI—Bemidji won NIC swimming championship Monday after taking the honors in both the 25-yard and 50-yard freestyle events and the 200-yard freestyle relay.

The temperature was in the high 60’s for the meet, and even though the water was a bit cool, it didn’t seem to bother the competitors.

Bemidji’s team of John Stahl, John Korcal, and Carl Fischer were third in the meet.

The Huskies were second in the meet with a team of Rob Johnson, Bill Collins, and John Gurney.

The Dragons were third in the meet with a team of John Stahl, John Korcal, and Carl Fischer.

Grupe tops in archery shoot

URBANA.—Number of the Westside Archers captured several places in Sunday’s archery shoot.

Tom Grupe led the way with a score of 505 in the State’s archery, with Jeff Fagan just behind him at 503.

Grupe also led the way with a score of 485 in the Illinois archery, with Jeff Fagan just behind him at 483.

In the Illinois archery, Grupe also led the way with a score of 485, with Fagan just behind him at 483.

Stock market turns upward; trading active

NEW YORK (AP) — The stock market turned upward to end the day after a day of rough sailing. Trading, which had been light for much of the day, was active.

The Dow Jones average of 30 industrial issues rose 7.23 above the previous close. The gain was attributed to a number of gains in the financial and transportation fields. The gain was helped by a number of reports indicating a possible economic improvement in the future.
