Panel OK's rebate bill

WASHINGTON (AP) — The Senate Appropriations Committee has approved $100 million in new aid for Taiwan, dealing the administration a political victory in its long-running dispute with Beijing.

The House and Senate had been locked in a months-long battle over the aid package, with the White House arguing that the aid would undermine its efforts to improve relations with China.

But the Senate panel's approval clears the way for further negotiations between the two chambers, and the White House said it was confident it could secure the necessary funding in the final bill.

The aid package, which includes $50 million for military hardware and $50 million for economic assistance, is part of a broader effort by the White House to reinforce its commitment to the island.

The White House has repeatedly said it supports continued engagement with Taiwan, but it has been cautious about providing military aid, fearing it could escalate tensions with Beijing.

The Senate panel's action comes as the administration faces pressure from both the Chinese government and lawmakers in Congress to strengthen ties with Taiwan.

The White House has said it supports continued engagement with Taiwan, but it has been cautious about providing military aid, fearing it could escalate tensions with Beijing.
WASHINGTON (AP) — Growing numbers of local governments are pulling out of the Social Security program at a time when the big federal program is under threat of going broke.

The Social Security program, which pays monthly retirement benefits to millions of Americans, is facing a $25 billion shortfall this year. The program is projected to run out of money in 2032, unless Congress takes action to increase taxes or reduce benefits.

Local governments, which include cities, counties and school districts, have had the option to opt out of the Social Security program since 1983. The option becomes more attractive as the federal program's financial difficulties grow.

A survey of local governments by The Associated Press found that 15 states and the District of Columbia had opted out of the Social Security program. In addition, 12 states are considering opting out.

The overwhelming majority of municipalities that have opted out said they did so because they believed Social Security was a federal program and not a local one.

The trend is worrying for the federal government, which relies on Social Security payments to cover as much as 40 percent of its budget.

To try to address the problem, the federal government has been exploring options such as raising payroll taxes or cutting benefits.

Local officials say they are not concerned about the federal government's ability to provide benefits in the future.

"We're not worried about the federal government going broke," said one local official. "Our members are focused on providing benefits to their employees and retirees."
No big problems foreseen in potential flood spots

By TERRY SODOMSKY  Staff Writer

WINONA — Workers, business owners and residents are breathing a sigh of relief as the local rainfall has been above average, not below average as had been feared.

The rain has kept the Mississippi River, which was flowing at flood stage earlier this month, at a level that is much lower than expected. The river is currently at 3 feet below flood stage, a significant drop from the 12 feet above flood stage that was feared.

"We're just really glad it's not as bad as we thought it might be," said John Smith, a resident of the city. "The rain has been a real blessing for us."
More on a messy subject—raw sewage in river

The Two Cities metropolitan area, as you well know, was once thought to be a "model" for its sewage treatment. But in recent years, the sewage discharge has become an issue of growing concern.

The annual volume through its sewage treatment plant is about 1 billion gallons.

If we were to shut down our plant and discharge into the river, it would take a year and a half to equal the amount of sewage the Two Cities plant discharges in a day.

Lake City, nestled on the shores of Lake Pepin, has an annual volume of 1.8 billion gallons of sewage.

You know how long it would take Lake City to equal the Twin Cities discharge if it were to close its plant?

37 years.

The Twin Cities want to put more raw sewage into the river. The Twin Cities Sawyer-Wheaton Committee do more so they can shut down their plants for a year.

The Twin Cities proposal, of course, is much more devastating in its potential impact. For the Twin Cities discharge is 10 times greater than the Twin Cities Sawyer-Wheaton Committee's at any time when pollution is more effective, 38 days compared to 37 years. For it is dissolved to be a "regular stream." The temporary results are obvious. The Twin Cities Sawyer-Wheaton Committee's proposal is far more effective.

The dissenting voices over the proposal are encouraged by the arrangements of the Metropolitan Water Coordinating Council. In February it was announced that it would discontinue the Twin Cities Sawyer-Wheaton Committee's proposal by April 30, 1976, and April 30, 1978. Right now, the Twin Cities Sawyer-Wheaton Committee's proposal is not a preferred plan. It has not been included in the Twin Cities Sawyer-Wheaton Committee's plans to divert sewage into the river. The Twin Cities Sawyer-Wheaton Committee's proposal has not been given serious attention.

If none of the seminars haven't been inspecte

The Twin Cities Sawyer-Wheaton Committee's proposal has not been given serious attention. A majority of the Twin Cities Sawyer-Wheaton Committee's legislative committee has supported the Twin Cities Sawyer-Wheaton Committee's proposal.

Ruggles 100th birthday noted

Carl Ruggles, composer, teacher and noted dean of American music, was born Feb. 18, 1904. Ruggles served in the U.S. Army during World War I until 1921, when he married Teresa Harrier and moved to New York City, where he taught violin at the Mar d' Mar Art Center in salute of the bridegroom is a graduate of the University of Minnesota. After Ruggles' death in 1971, his wife was a prominent figure in the music world.

Additional information

February Ceremony at First Unitarian Church

On Feb. 15, 1945, at 7 p.m., the fourth floor of the Choate School's library will host a ceremony to honor Teresa Harrier and, back row, Jan H. Nelson, Lynn Mahlkne, Joan Nelson, Lynn Mahlkne, and the Wihona Women's Auxiliary. The ceremony will feature the presentation of awards, which will be presented to Mrs. J. J. Carroll, auxiliary president, and Jennifer Carroll, Tonya Chase, Cynthia Grothem, and Jennifer Carroll, secretary.

Candy striper awards

The candy striper awards, presented at the event, were in recognition of the hard work and dedication of the candy stripers. These awards were given to Mrs. Jennifer Carroll, Jane Carroll, Patty Chase, Cynthia Grothem, and Jennifer Carroll. The awards were presented by Mrs. Jack Cornwell, past president.

Community Memorial Hospital

The Community Memorial Hospital honored its candy strippers at an awards dinner on Wednesday evening at the hotel. The event was sponsored by the hospital's Auxiliary, and the awards were presented by the Auxiliary's president, Mrs. Jennifer Carroll, Jane Carroll, Patty Chase, Cynthia Grothem, and Jennifer Carroll. The awards were presented by Mrs. Jack Cornwell, past president.

Dear Abby

She wants her baby

By Abby Van Buren

When a baby is born, it's the most precious gift anyone can receive. You get to hold that little bundle of joy in your arms, and it's one of the most magical moments of life. But what happens when you want to give them something special as a gift? How do you decide what to give? What do you include in the box? These are all questions that need to be answered when planning a gift for a new baby.

Dear GRANNY-SHORE: Your dear son is interested in starting a new hobby, but he's not sure what he wants to do. He's been thinking about starting a knitting project for a while, but he's not sure if he should try it. How do you decide if you should try knitting? What are some tips for beginners?

Dear WINONA: A group of friends has decided to hold a bake sale to raise money for a local charity. They're looking for ideas on what kind of baked goods they should sell. What are some ideas for bake sale items? How do you decide what to make for a bake sale?

Dear RAINBOW: You're a rainbow who is interested in studying the colors of the rainbow. How do you decide what colors to study? What are some tips for rainbow enthusiasts?

Dear DAR: You're a national organization that honors women who have made significant contributions to society. How do you decide who to honor? How do you choose the winners?

Montgomery WARD spirit of value 76
NEW YORK (AP) — Two studies on TV violence, ordered commissioned by NBC are out now — after five years of work by two research teams. And they sort of offer no hard evidence to pin down whether or不是 posing issues.

The study is by Dr. Melvin B. Rotton, a child psychologist, and the National Academy of Sciences. It found that "on average, people tend to believe that TV violence studies are more authoritative and more influential than they actually are." It also found that "the media have a tendency to exaggerate the influence of television violence on viewers."

In other words, TV violence isn't always as powerful as it's portrayed in the media. But the study also found that "TV violence does have an impact on viewers, but it's often a subtle and indirect one."

The other study, by Lieberman Research, Inc., says "understandable conditions and depending on the intensity of violence portrayed, exposure to television violence is capable of increasing aggressive behavior in children."

But the words "under certain circumstances and depending on the intensity of violence portrayed, exposure to television violence is capable of increasing aggressive behavior in children" are a bit confusing. They make it seem like TV violence doesn't increase aggression on every child.

The Liebermann study covered much more than the two recent studies, and it says "the press is often too quick to jump to conclusions."

That might accomplish much more than the two recent studies, and it's a good reminder to think carefully about what we read and hear.

For more on TV violence, check out the Smiths Means Service, which offers many ways to be elegantly seated at very special prices.
Weather

Winter storm warning issued.

Two local forecasts are available, with models in today's issue. A winter storm warning was issued for the area, with a high of 45 degrees and a low of 35 degrees. The forecast calls for a 50 percent chance of snow showers and a 50 percent chance of rain showers. The wind will be from the northwest at 10 to 15 mph, with gusts up to 25 mph. The temperature will fall to 10 degrees this afternoon, with a high of 20 degrees and a low of 10 degrees. The wind will be from the west at 15 to 25 mph, with gusts up to 35 mph. The temperature will fall to 5 degrees this afternoon, with a high of 15 degrees and a low of 5 degrees. The wind will be from the northwest at 15 to 25 mph, with gusts up to 35 mph.

Local observations

- High temperature: 35 degrees
- Low temperature: 25 degrees
- Precipitation: 0.1 inches
- Wind: West at 15 mph
- Humidity: 80 percent
- Pressure: 29.93 inches

A winter storm warning was issued for southern Wisconsin, with a high of 35 degrees and a low of 25 degrees. The forecast calls for a 50 percent chance of snow showers and a 50 percent chance of rain showers. The wind will be from the northwest at 10 to 15 mph, with gusts up to 25 mph. The temperature will fall to 10 degrees this afternoon, with a high of 20 degrees and a low of 10 degrees. The wind will be from the west at 15 to 25 mph, with gusts up to 35 mph. The temperature will fall to 5 degrees this afternoon, with a high of 15 degrees and a low of 5 degrees. The wind will be from the northwest at 15 to 25 mph, with gusts up to 35 mph.

Conservation tillage may revitalize agriculture

By TONI JAVEN

Agricultural farmers around the world are reviving 300-year-old tillage practices — called "no-till" or "conservation tillage," because they require almost no soil disturbance. This means that when farmers plant their crops, they sow them between the rows of their previous crop. The plant residue left from the previous crop helps protect the soil and conserve water, while also nourishing the soil.

This is the position in which the soil is left fallow, or "in place" until the next crop is planted. In this way, the land is not "plowed" and "tilled" as it is traditionally done.

But despite the obvious advantages of conservation tillage, farmers in the United States have been slow to adopt it. Only about one million acres in the United States are cultivated using no-till systems.

In Illinois, for example, where conservation tillage is relatively widespread, almost 200,000 acres are still used every year to renew the soil's fertility by "plowing" it. This means that the land is tilled and turned over to prepare it for the next crop, which can be a costly and time-consuming process.

But some people who have practiced conservation tillage on their farms say that the benefits are worth the effort. In addition, they say that the techniques are becoming more popular as farmers become more aware of the advantages of using conservation tillage systems.

The no-till system is especially effective in areas where the soil is dry or where there is a risk of soil erosion. In these situations, the traditional plowing systems can be inefficient and ineffective, while the no-till system can be more effective in conserving the soil's moisture and nutrients.

In conclusion, conservation tillage is a promising approach to revitalize agriculture and help farmers conserve their land. By using this method, farmers can reduce soil erosion, conserve water, and increase the productivity of their land. It is a technique that is gaining popularity among farmers around the world, and it is expected to play an increasingly important role in the future of agriculture.
Growing food: a challenge to American agriculturists

On the horizon, there is no problem more formidable, just as U.S. agriculture generally is organized. They believe they can produce 1.88 billion tons of food by the turn of the century just to stay ahead of demand on a planet where the population currently jumps by about 98 million people (about 2 percent) a year. Harmony ousted by Pacelli 68-56

By BRUCE CLOSWAY

STEVENS POINT, Wis. — Playing smash-mouth basketball without full court press.

At least that's what Harmony decided to do in its Region 8A Boys Basketball Tournament game against Austin (26-6). The harmony between Chris Baxley, 6-4, forward, and Dave Esswein, 6-2, center, was perfect.

The Flames proceeded to outscore the North Stars 34 seconds before the end of the first period.

He saw the Flames finish two games back in the regular season with a 12-2 record. Their only losses came against unbeaten Chetek and Pacelli.

Chetek senior guard, and his boys muddled through a 9-9 regular season and currently sports the Class B state tournament — Saturday at 8 p.m. — between the two.

Although he has coached all these kids, with the exception of Mike Austin, he has no apprehension about the situation. "We had to stay with the same personnel as much as possible this year," explained Elston. "We had to stay with the same personnel as much as possible this year.'

The native of Cuba received MVP of the Florida Winter League and has signed for $30,000. He started 14 games last year, a higher percentage than in any previous year, a higher percentage than in any previous year.

The Twins' highest paid pitcher is Dave Stieb, who is signed at $200,000. Last fall, he started 14 games, a higher percentage than in any previous year, a higher percentage than in any previous year.

"I don't know what their intentions were," said Griffith. "I hope they don't. I don't like the idea of being injured, but I don't know what their intentions were."

"It's not unfair to the fans," said Griffith. "I hope they don't expect too much this year."

"We like to set up in a 2-1-2 zone on defense so we can run out of bounds and break the game on offense, when we get into trouble."

The Buffaloes will go into the game averaging 64.8 points per game.

"I don't believe it's fair to the fans," said Griffith. "I hope they don't expect too much this year."

"I don't know what their intentions were," said Griffith. "I hope they don't. I don't like the idea of being injured, but I don't know what their intentions were."

May, Dantley head AP All-America team

NEW YORK (AP) — basketball stars for the U.S. Olympic Dream Team. Donna's 6·4, 196-pound, 16-year-old daughter, won the 1976 Associated Press All-American basketball team honors. Dantley was named to the 1976 Associated Press All-American basketball team.

Dantley, a 6·3, 196-pound junior, was named the Associated Press second-team selection last year. He averaged 21 points and eight rebounds per game for the Irish.

Lee of Oregon; Tennessee, Terry Fortenberry of Missouri, George Call of Central California, Kentucky's Sonny Parker and Mississippi State's Mike Phillips.

North Carolina, Ron Lee, 6·4, senior, collected nine rebounds and 17 points.

Wisconsin, Dave Johnson, 6·8, senior, collected nine, rebounds and 17 points.

WACO, Texas' Jim Hoge, 6·3, senior, collected nine, rebounds and 17 points.

Collegiate basketball coaches named Dantley the AP's second-team selection.

Danley's selection came as no surprise to his coach, who predicted he would be named an All-American.

"Danley's selection came as no surprise to his coach, who predicted he would be named an All-American."
